

Inventory Pilot

Know what you have. Know where it went.

Scan barcodes, record stock movement and attach checkouts to jobs so the stockroom has a usable history.

Scan and identify

Use a phone camera to scan barcodes. Create labels for items that need them.

Check in and out

Record quantities, job numbers, customer details and notes.

Organize the stockroom

Keep part numbers, descriptions, locations and item photos together.

Prepare billing records

Review job and customer reports. Print and reprint checkout packing slips.

Planned connection: a shared parts/materials catalog and stock syncing across the Pilot apps.
