

Where it fits

Shops that need to track parts, supplies and job-related inventory use.

A useful first demo

Scan a part, check it out to a job, then review the packing slip and job report.

Planned connection: a shared parts/materials catalog and stock syncing across the Pilot apps.

Request a demonstration

See a workflow using your own sample job, parts list or customer PO.

Inventory Pilot

Know what you have. Know where it went.

Barcode inventory and stock movement

THE WORKFLOW

The day-to-day work

01 Find

Search for an item or scan its barcode.

02 Record

Enter the quantity coming in or going out.

03 Assign

Add the job reference and checkout details.

04 Review

Use the history, reports and packing slip.

CORE FEATURES

What the app does

Scan and identify

Use a phone camera to scan barcodes. Create labels for items that need them.

Check in and out

Record quantities, job numbers, customer details and notes.

Organize the stockroom

Keep part numbers, descriptions, locations and item photos together.

Prepare billing records

Review job and customer reports. Print and reprint checkout packing slips.

IN YOUR SHOP

Stockroom details that stay useful

Keep an item's location and photo close to its part number. Separate purchase cost from selling price, with cost visibility controlled by user role.

A record of stock movement tied to the work that used it.
