

Where it fits

Shops that need organized customer records and flexible billing for fabrication work.

A useful first demo

Upload a customer PO, link a Fab Pilot job and prepare a partial invoice.

Fab Pilot job billing is connected.
Automatic Inventory Pilot stock syncing is planned.

Request a demonstration

See a workflow using your own sample job, parts list or customer PO.

A close-up, high-contrast photograph of industrial metal components, possibly CNC-machined parts, with a dark, moody lighting scheme. The image is positioned at the top of the right-hand section of the page.

PITTER ENTERPRISES LLC

Invoice Pilot

Keep the paperwork moving

Customer orders, quotes and invoicing

THE WORKFLOW

The day-to-day work

01 Capture

Save the customer order and PO document.

02 Prepare

Build a quote or bring in Fab Pilot job details.

03 Invoice

Bill the selected items or completed quantity.

04 Follow up

Review payment records and outstanding invoices.

CORE FEATURES

What the app does

Keep customer orders

Upload customer PO PDFs. Keep orders independent or link them to Fab Pilot jobs.

Build quotes and invoices

Use customer profiles, clear line items and printable PDF documents.

Bill in stages

Select items and quantities for an invoice. Keep the remaining work available for later billing.

Review the money

Record payments and review customer, sales and receivables reports.

IN YOUR SHOP

Orders can follow your workflow

Create a pending order before production starts. Link it to an existing Fab Pilot job, add a job later, or keep the order independent. Retain the customer document with the order.

Customer paperwork and billing tied to the work behind them.
