

PITTER ENTERPRISES LLC

The Pilot apps

Software for fabrication shops

Fab Pilot
Inventory Pilot
Invoice Pilot

Customer overview / September 2026

The work behind every job

Each app focuses on a question your team needs to answer.

01 What needs to happen next?

Fab Pilot keeps job priorities, processes and work time in view.

02 Where did the inventory go?

Inventory Pilot records stock movement against the job.

03 What is ready to invoice?

Invoice Pilot brings customer orders and billing together.

Choose the app that fits the work

App	Primary role	Typical users
Fab Pilot	Estimating and production	Managers and shop teams
Inventory Pilot	Stock movement and barcodes	Stockroom and shop teams
Invoice Pilot	Orders, quotes and invoices	Owners and office teams

Use one app for a focused need or discuss a package for your shop.

Fab Pilot

Estimating and production management

Know where every job stands

Prepare estimates and manage fabrication work, with job priorities, employee time and costs in view.

Direct the work

Set priorities, due dates and process order. Release new work or repeat a proven job.

Capture shop time

Use employee PINs and start/pause controls. Review time by employee, station and job.

Prepare estimates

Review CAD files, materials and process costs. Keep drawings with the job.

Review before billing

Compare quoted and actual costs. Send completed work into Invoice Pilot.

Inventory Pilot

Barcode inventory and stock movement

Know what you have. Know where it went.

Scan barcodes, record stock movement and attach checkouts to jobs so the stockroom has a usable history.

Scan and identify

Use a phone camera to scan barcodes. Create labels for items that need them.

Check in and out

Record quantities, job numbers, customer details and notes.

Organize the stockroom

Keep part numbers, descriptions, locations and item photos together.

Prepare billing records

Review job and customer reports. Print and reprint checkout packing slips.

Invoice Pilot

Customer orders, quotes and invoicing

Keep the paperwork moving

Manage customer orders, quotes and invoices, with purchase-order documents and job details close at hand.

Keep customer orders

Upload customer PO PDFs. Keep orders independent or link them to Fab Pilot jobs.

Build quotes and invoices

Use customer profiles, clear line items and printable PDF documents.

Bill in stages

Select items and quantities for an invoice. Keep the remaining work available for later billing.

Review the money

Record payments and review customer, sales and receivables reports.

Fab Pilot and Invoice Pilot together

A job can carry its production details into billing.

- | | | |
|-----------|--------------------------------|---|
| 01 | Customer order | Save the PO in Invoice Pilot. Link a Fab Pilot job when useful. |
| 02 | Shop work | Track the job, materials and labor in Fab Pilot. |
| 03 | Billing review | Bring the job details into an editable Invoice Pilot draft. |
| 04 | Partial or full invoice | Bill selected quantities. Keep any remaining work available. |

Inventory Pilot stock syncing is a planned connection.

A view for each role

On the shop floor

Shared station access and employee PINs in Fab Pilot

Barcode check-in and checkout in Inventory Pilot

Job references and notes close to the work

In the office

Job progress, labor and cost review

Customer PO documents and invoice drafts

Reports, printouts and access controls

Current workflows and planned features

Area	Status
Core workflows in all three web apps	Available for demonstration
Fab Pilot job-to-invoice handoff	Connected
Shared catalog and Inventory Pilot stock syncing	Planned
Desktop/offline suite and shared sign-in	Planned

Ask for the current package and rollout details for your company.

A demo built around your work

Choose a real workflow to evaluate before you commit.

01 A production job

See its release, employee time and completion review in Fab Pilot.

02 A stockroom checkout

Scan an item and trace the movement to a job in Inventory Pilot.

03 A customer order

Keep its PO, job link and partial invoice together in Invoice Pilot.

REQUEST A DEMONSTRATION

See your shop's workflow

Bring a sample job, parts list or customer PO. We will walk through the relevant app and discuss the right starting point.
